## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tripp ('630) in view of either Murphy 3,957,250 or Mockry 6,189,285. The primary reference discloses the invention substantially as claimed, namely a plurality of flexible strips helically wound upon one another to form a post or pole; see Figure 6, column 2, lines 33-38, column 3, lines 16-31 and column 3, lines 57-59. However, it does not disclose a transverse hole through the pole. The secondary references disclose placing a transverse hole and a hollow tube through a post in order to form a fence; see Figure 5 of Murphy and Figure 7 of Mockry. It would have been obvious to one of ordinary skill in the art to form a transverse hole and place a hollow tube through the post in the product of the primary reference in view of the secondary references, depending on the end use of the post, for example to form a fence or support post.

### ***Allowable Subject Matter***

3. Claims 1-10 and 12-19 are allowed.
